

Distance Learning Maths for Classes 7

Dear Classes 7,

Here is the schedule for our learning over the next three weeks. Each week's work consists of two parts:

1. I'm going to make sure we do some "revision drills" each week, these are exercises which ideally you do a couple of questions each day. As I keep saying - it's the practice that makes the learning "stick" so even if we do a little bit each day, it will become easy and automatic for us by the end of the year.
2. There will be a new topic each week based on what I had planned to do this year. I'm starting with enlargements because it's a fairly easy topic that can help us get used to this new way of working.

I suggest 15 minutes each day on revision drills and 2 - 3 slots per week to make up one and a half hours for the new topic. You will have to decide what times each week you sit down to do maths based on your family schedule.

Each week, I'll post a lesson video (with me teaching!) and some work to complete which you should then return to me at maths@michaelhall.co.uk. Any questions or help you need can be emailed here too. Please return all the work by Friday latest (but try and send it as you go along) and I'll mark and return by the following week.

Here's the schedule for the first three weeks:

Week 1

Revision drills: Decimals

New topic: Enlargements

Week 2

Revision drills: Decimals

New topic: Drawing graphs from equations and finding the equation of a line

Week 3

Revision drills: Decimals and Fractions

New topic: Negative Numbers Review

Enjoy!

Warm regards,

Mrs. Hawker
