

Dear Class 8

I hope you are well and managing to keep yourselves busy.

I wonder if you managed to make a fused plastic bag?

I am sorry if you could not find any plastic bags in your house.

So, I expanded the project slightly.

As a part of the recycling/upcycling project, I would like you to re-make some items using disused/unwanted textiles from your house. I attached a few examples, but you may choose to do something you research or even you invent by yourself.

I expect see at least one item completed by 15th May.
